

AVICENNA MEDICAL COLLEGE

Dated: 12-04-22

LAHORE, PAKISTAN

**GENERAL ASSESMENT OF MAIN EDUCATIONAL PROGRAMME LEVEL DOCTOR
OF THE KYRGYZ REPUBLIC UNIVERSITY ADAM**

I Dr. Muhammad Muneeb Ather working as Assistant Professor in Anatomy at Avicenna Medical College Lahore Pakistan. I go through the Main Educational Programme of your university and main points of my **observation** are:

1. Your curriculum is highly professional and up to the mark.
2. Your division of subjects and credit hours are justified.
3. The best thing of your system is that you included socio personal and cultural competences, which overcomes the orthodox method of teaching.

Besides this I have some **recommendations** in order to upgrade your Main Educational Programme for Doctors:

1. Preventive activities must include education of students at school level in order to prevent communicable diseases. This can be done by visits to local schools by Medical Students.
2. Conferences should be organized which would give chance to International Researchers to present their work. This can enhance the vision of research of your students and can take many new ideas from new researches.
3. As we all know that past few years the entire world had faced Pandemic. This pandemic totally changed the idea of learning and education. You must include Online Lectures in your curriculum by engaging International Teachers to provide high quality education.

Dr. Muhammad Muneeb Ather
Assistant Professor Anatomy
Avicenna Medical College, Lahore.
