**Comments of respondents:** “The teacher didn’t use to explain the topic, she made us write entire lectures so instead of explaining and doing critical work on the lesson when simply used to write for two lecture lesson consecutively, for 4 hours that is. We didn’t gain anything from writing entire lectures. notes should be made to make learning easier in the form of flashcards or quizzes or important facts. Not entire lectures. Further, the questions that came in modules and exams were not related to what we studied in the class. The class lectures were very easy as compared to what we were asked in the exam.”

“Overall her teaching style was satisfactory but she made us write the entire lecture which was very lengthy and because of writing we were not able to understand the lecture. It was better if she gave lectures and let us make notes according to our understanding.”

According to the questionnaire, the following results can be made:

- There is a lack of motivation of students to participate in the survey
- Not all students know about the E-library. They also mentioned that there is a shortage of electronic materials in the library.
- There are 4 teachers whose average point is less than "4". These cases should be in consideration.
- Overall, students have good feedback and are feel free to express their opinion.
